`I sauh a tour on a toft, tryelyche i-maket', part two:

on Place-Names in -toft in England

Peder Gammeltoft University of Copenhagen

The place-name element -toft has received only marginal treatment in the British Isles. Apart from Bengt Holmberg's thesis and the present writer's overview of the Scottish toft place-name material, this group of place-names has been the focus of very little research, despite the fact that the element may be used to throw new light on the complex linguistic situation in Viking Age and post-Conquest England.

The place-name element toft is ultimately of Scandinavian origin, having been transferred into the languages and onomastica of England and Scotland through either Old Danish (ODa) toft, f., or Old Norse (ON) topt, f. I shall not elaborate further on the origin of this place-name element, as this has already been dealt with in my above-mentioned article on the subject. As a placename element of Scandinavian origin, toft is part of the large body of Viking Age place-names which include such prominent and well-researched Scandinavian place-name elements as by, borp and byeit. One complicating factor in the study of the place-name element toft is the early borrowing of toft into English. It occurs as an appellative as early as 1001 in English in the phrase healf bæt land æt suðham innur and uttur on tofte and on crofte (`half the land at Southam, including homestead as well as

¹B. Holmberg, *Tomt och Toft som Appellativ och Ortsnamnselement*, Studier till en svensk ortnamnsatlas, 4 (Uppsala and Copenhagen, 1946); P. Gammeltoft, "I sauh a tour on a toft, tryelyche i-maket": on place-names in *-toft*, *-tote* and *-tobhta* from Shetland to the Isle of Man', *Nomina*, 24 (2001), 17–32.

land'),² and even earlier as a place-name element in a document from 963: and healfe hide on hibaldes tofte (`and half a hide on Hibald's toft').3 These two examples show that *toft* was not only borrowed into English already during the Old English (OE) period but also functioned as a fully fledged constituent of the English language, be it on an appellatival or an onomastic level. That we are most probably dealing with an English and not a Norse formation is accentuated in the 963 entry where the specific of the place-name hibaldes tofte is the Old English personal name Hygbald, m., although the theoretical possibility exists that hibaldes tofte could have been coined by Scandinavian speakers. However, the presence of an English personal name in a place-name with a generic of ultimately Scandinavian origin as early as 963 must mean that by then toft was fully accepted as a place-name element in the local language community.

²J. M. Kemble, *Codex Diplomaticus Aevi Saxonici*, 6 vols (London, 1839–48), no. 705.

³W. de G. Birch, *Cartularium Saxonicum*, 3 vols and index (London, 1885–99), no. 1112.

As the above examples have shown, ON *toft*, f., is one of the earliest known Scandinavian words and place-name elements to be borrowed into English. According to the *Oxford English Dictionary*, the core meaning of *toft* in English is that of 'a homestead, the site of a house and its out-buildings'. Sometimes *toft* may also signify 'a settlement site and its accompanying land', a connotation stressed through the often used legal phrase *toft and croft*. A third, and a somewhat extended connotation of *toft*, is that of 'a knoll or hillock, especially one suitable for settlement'. A prime example of this latter meaning is found in the *Piers Plowman* quotation which forms part of the title of this article: *I sauh a Tour on a Toft—tryelyche i-maket; a Deop Dale bi-neoþe* (`I saw a tower on a hillock, very well-built; a deep valley below').

The denotative signification, however, does not seem to be a complete one-to-one relationship to the appellatival connotation of *toft*. In Denmark, *toft* has been used to coin habitative names as well as field-names. Although the denotational gap between that of 'a settlement' and that of 'a field' appears wide, it seems to have its roots in the original denotation of 'a site for settlement'. This denotation carries considerable elasticity because the 'site' itself must necessarily have included the settlement plot as well as some amount of accompanying land.⁵

The potential for this two-fold denotation seems to stretch back into the Viking Age, as this denotational span is found not only in Scandinavia, but is also extremely common with *toft*-names in England. How wide this denotational span has appeared in the naming situation, or whether it has been apparent to the namer at all, is impossible to say. What is apparent, though, is the seeming overlapping of naming motives of the two

⁴⁰xford English Dictionary, edited by J. A. Simpson and E. S. C. Weiner, 2nd edn (Oxford, 1989), s.v. toft¹.

⁵Cf. Danmarks stednavne, vol. 17.2,2 (Copenhagen, 1984), xxxix-xl.

denotations to such an extent that there is no discernible difference between them. Typologically speaking, there is no way of telling the difference between, say, the Northamptonshire parish name of Sibbertoft (1086) Sibertod, 11th c. Sibertoft) and the field name of Grimbaldstoft (1246 Grimbaldstoft), as either name is specified by a personal name, namely ON Sigbjörn, m., or OE Sigebeorth, m., and Continental Germanic (ContGerm) Grimbeald, m.6 In the same way, the Old Norse appellative búr, n., 'a storage house', may equally well be applied to a settlement, such as the hamlet of Burtoft in Wigtoft, Lincolnshire (1086 Burtoft), or to a field, as in the case of Burtofts in Yorkshire (1196 Burtofts) and Burtofts in Leicestershire (1703 Burtofts). In other words, it is impossible to tell whether a place-name in -toft is an original settlement name or an original field-name.

As I mentioned at the beginning, toft has only rarely been focused on in English place-name studies. In fact, the only relatively detailed study so far is the abovementioned Benat Holmberg's Tomt och Toft som Appellativ och Ortsnamnselement from 1946. In this work. he lists 162 names containing toft in England, the majority of which he has taken from Harald Lindkvist's Middle English Place-Names of Scandinavian Origin from 1912.7 My own compilation of English toft-names has so far tallied some 282 place-names. Place-names in -toft are scattered over the areas of Viking Age Scandinavian settlement, i.e. all of eastern and northern England. including a slight drizzle of toft-names into Gloucestershire. The greatest concentrations of names in this material are to be found in Cambridgeshire (13). Leicestershire (30), Lincolnshire (90), Norfolk (23), Yorkshire (76) and Westmorland (12). The remaining counties have less than ten toft-names each. The present

⁶See the appendix for a more detailed description of this and other *toft*-names.

⁷H. Lindkvist, *Middle English Place-Names of Scandinavian Origin* (Uppsala, 1912), pp. 208–24.

material has mainly been collected from printed placename works, as detailed below. The great flaw of collecting place-names from such works is that the wellresearched areas also become the better-represented ones. Therefore, it is necessary to bear in mind that the number of names for each county is more or less proportional to the amount of research into the placenames of the area. Since my collection and recording of place-names in *toft* is still ongoing, the number of 282 may only be seen as a preliminary figure. Personally, I am certain that it should be possible to add an additional 50-100 names to the present material, if not more.

Far from all these *toft*-names are of Scandinavian origin; a fair number have been coined in the Middle English period. Nonetheless, a large number of names appear to have been coined during the Viking Age, if not by Scandinavians, then at least by people heavily influenced by them. For this reason, it is exceedingly difficult to establish whether a place-name in *toft* is a Scandinavian, Anglo-Scandinavian or purely English construction.

The problem of determining the language of coinage of toft-names is mainly owing to the success of this element

8The various English Place-Name Society volumes (EPNS + volume number); K. Cameron, A Dictionary of Lincolnshire Place-Names, English Place-Name Society, Popular Series 1 (Nottingham, 1998) (Cameron 1998); B. Cox, `The Place-Names of Leicestershire and Rutland' (unpublished doctoral dissertation, University of Nottingham, 1971) (PNLeiR): G. Fellows Jensen, Scandinavian Personal Names in Lincolnshire and Yorkshire, Navnestudier, 7 (Copenhagen, 1968) (SPNLY); G. Fellows Jensen, Scandinavian Settlement Names in Yorkshire, Navnestudier, 11 (Copenhagen, 1972) (SSNY); G. Fellows-Jensen, Scandinavian Settlement Names in the North-West (Copenhagen, 1985) (SSNNW); K. Hald, `Nordiske stednavne i Lincolnshire' (unpublished doctoral dissertation, University of Copenhagen, 1930) (Hald 1930); Holmberg, Tomt och Toft (Holmb.); Lindkvist, Middle English Place-Names (Lindkv.).

as an appellative in English. From the evidence of the element's appearance in, for instance, the 1001 text, it is apparent that *toft* was one of the first everyday Scandinavian terms to be borrowed into English. This is evidenced for example in the 1001 example *on tofte*, where *toft* takes the Old English dative form in accordance with the preposition *on*. Similarly, placenames in *-toft* are often found in the Latinised form *-toftum*, as in the case of Emmetoft, Benniworth, Lincs., which occurs in a twelfth-century document in Latin as *Emmetoftum*. The gender corresponds to that in Scandinavian, the *-um* in *Emmetoftum* being a Latin feminine accusative inflexion. The series of the series of the evidence of the end of the series of the ser

When we encounter toft in place-names, a number of notable changes in comparison to the early appellatival occurrences have taken place. From the Domesday Book entries and onwards the plural form of toft is always found with the -es plural form from the former Old English masculine a-stem nouns, as for instance in the Norfolk parish name of Toftrees which is written *Toftes* and *Totes* in Domesday Book. This change must be seen as an early example of the levelling of Old English plural declensions under the -s plural, a process that began in the northern parts of England. In fact, there is not a single recorded instance of a plural toft-place-name in England which features even remnants of the original Old Norse feminine *i*-stem *ir*-plural. This is in stark contrast to, for instance, toft-names in the Hebrides, such as Seilastotar and Steinatotair in the Isle of Lewis, which appear to have retained the original Old Norse plural marker. This must signify that by the time of the compilation of the Domesday Book, toft had been fully incorporated into the

⁹Emmetoft, Benniworth, Lincolnshire. Sl. 12th c. K fol. 27b *Emmetoftum*.

¹⁰Although -um is also a dative plural inflection in both Old English and Old Norse, in the context of the manuscript *Emmatoftum* reflects the Latin feminine accusative form. Cf. Hald, `Nordiske stednavne i Lincolnshire', p. 298.

Northern English dialect and henceforth took part in the local levelling of the noun system on all linguistic levels. The consequence of this to the place-name researcher is that it is in reality impossible to distinguish a purely Scandinavian *toft*-coinage from one created within an English framework, at least on grounds of the form of the generic element of a place-name in *-toft*.

If the generic element does not offer any indications as to whether a *toft*-place-name is of Scandinavian origin or not, the specific element might instead be a safer indicator. Of the 282 place-names in *toft* which I have so far collected, 228 are original compound formations. Owing to the long productivity span of this place-name element, it goes without saying that far from all of the place-names in this material can be regarded as of Scandinavian origin. Nonetheless, I have chosen to see the material as a whole for this paper.

The most striking feature of the material at hand is the overwhelming number of personal names, bynames or occupational designations, etc., 119 in total, or in excess of fifty per cent of the specifics in toft-names belong to this category. Of these, fifty-four are of Scandinavian origin whereas forty have an English source. Thirteen may be of either Scandinavian or English origin and another twelve have a French. Continental Germanic or Irish origin. In general, the toft-place-names that contain English and French sourced personal names should be considered to be English or Anglo-Scandinavian constructions, and only the sixty-seven names with a Scandinavian or a possible Scandinavian personal name as the specific can be considered to be possible Scandinavian coinages. But even here, it is difficult positively to determine the Scandinavian origin, as Scandinavian personal names were also subject to borrowing into Old English. Formally, the only certain Scandinavian coinage in this group is Branzthoft, in Lincolnshire (c.1150) Branzthoft), the specific of which is which is the Old Norse personal name Brandr, m., with an Old Norse -s genitive

singular marker. 11 In some instances, such as Caletoft, Lincs.? (1268 Caletoft < poss. ON persn. Kali, m.), Gilletoft, Yorkshire (1439 Gilletoft < ON persn. Gilli, m.), Gippetoft, Lincs. (c.1242 in Gippetoft < ON persn. *Gippi, m.?), Gunnetoft, Lincs. (12th-14th c. in Gunnetoft < ON persn. Gunni, m./ Gunna, f.), Oretoftes, Yorkshire (13th c. Oretoftes < prob. ON persn. Ári. m.), Toletoftes, Lincs. (14th c. Toletoftes. < ON persn. Tóli, m.), Totetoft, Lincs. (1200 Totetoft < ON persn. Tóti, m.), etc., the medial 'e' may possibly represent the remnants of the Old Norse weak masculine genitive singular form, although it may just as well merely be a linking 'e'. 12 In the majority of cases, however, where the toft-name material is modified by a Scandinavian personal name or personal designation. the source forms show either a zero form, as with Renildtoft. Lincolnshire (12th-14th c. Renildtoft < ON persn. Ragnhildr. f.) and Sywardtoft, Lincolnshire (c.1242) in Sywardtoft < ON persn. Sigvarðr, m.), or an Old English -es genitive form, as for example Bernestoft, Yorkshire (13th c. Bernestoft < ON persn. Björn, m.) and Ermestoft, Warwickshire (1216-72 Ermestoft < ON persn. in Arn-?), making these names typologically indistinguishable from toft place-names compounded by an Old English personal name: compare for instance Neucumentoftes, Westmorland (13th c. Neucumentoftes < ME byn. Neucumen 'a newly arrived stranger'), Edmundtoft, Yorkshire (1488 Edmundtoft < OE persn. Eadmund, m.) and Bremestoft, Norfolk (< OE persn. Brem. m.). Whether this means that such constructions are purely English in origin is uncertain: a fair number of these undoubtedly represent Anglicisations of original Scandinavian constructions.

The specific material which does not signal a person's association to a *toft*-locality is a mixture of Scandinavian and English word stock, an aspect which strengthens the impression that this place-name element has been much

¹¹Cf. SPNLY, p. xcix.

¹²¹bid., p. c.

used in a bilingual or contact linguistic environment. Owing to the introductory nature of this paper, it will suffice to mention a few examples that show evidence of toft being used by both Scandinavian and English speaking people. For instance, the occurrence of the treedesignation ash, OE æsc, ON askr/eski, as in Eshetoftes, Yorkshire (1158–67 Eshetoftes) and Eastoft, Lincs. (c.1200) Esketoft), shows that Eshetoftes probably has been coined by English speakers, because of the palatalisation of Germanic [sk] to OE [ʃ] in the specific element, whereas the unpalatalised [sk] in the specific of the source form of Eastoft betrays that its origin is ON eski, m., 'ash-trees', a collective noun of ON askr. m. The two Yorkshire Saintofts (Saintoft, Pickering, YNR (1335 P Centoftdikes), Saintofts, Warter, YER (early 12th c. Sintoftes) seemingly contain the Old English word sænget, 'burnt', probably meaning 'the toft cleared by burning' or 'the toft destroyed by burning'. As such they could be a translation of an original ON *Brendatoft (compare for instance the Faroese Brendatoft where the specific is derived from ON brenna, vb. 'to burn'). 13 In total, the present material comprises roughly ninety toft-names which contain ordinary word stock, of which roughly a third is of Scandinavian origin, a third of English origin (of varying periods), whereas the final third of the material contains word stock of either Scandinavian or English origin.

It is my hope that this brief overview of the English place-name material in *toft* has drawn attention to a number of interesting points and shown the research potential for this place-name type. However brief, it is evident from the above survey that this place-name element in English cannot but be studied from a contact linguistic point of view, since *-toft* has been used by both Scandinavian and English speaking people alike. An obvious path to tread in this respect is to try and outline the transition of *toft* from being a purely Scandinavian

¹³Cf. P. Gammeltoft, 'Toften rundt-Et blik på færøske stednavne på toft', *Eyvindarmál* (Tórshavn, 2002), pp. 122 and 126.

element to becoming a fully Anglo-Scandinavian and later eastern and northern English place-name element, if at all possible. Another important aspect which needs further study is the relationship between the dual place-name function of -toft. Why is -toft used both of settlements and of fields? How old is this feature and is it comparable to that found in, for instance, Denmark? Given that this place-name material on the one hand is relatively transparent and on the other hand shows up complexities of morphology, it is evident that more work needs to be done on the use of Old English genitive markers in placenames of ultimately Scandinavian origin and on the question of the use of genitive markers in personal name + generic constructions in general. As was the case with the Scottish place-name material in *-toft*, this element has proved to be more diverse and complicated than has hitherto been realised. I hope that by discussing merely a few of the most central points I have managed to show the potential as well as potential pitfalls of the placename element toft.
