This file is automatically generated from the bibliography database Nomina.bib, which is itself automatically generated from Nomina_contents.html by Nomina_to_bibtex_01.py. The file Nomina_contents.html is itself generated from a plain ascii file Nomina_contents.txt (which is thus the basic source of all data here) by txt_to_html_01.py. The bibliography uses a style file JEPNS_biblatex.sty written by me, together with the biblatex package.
